

CHANGE FOR CHILDREN'S

children'shealthSM 

What is Change for Children's?

Change for Children's is a simple, but powerful, program that supports Children's HealthSM, teaches our children the importance of giving back to their community and heightens awareness of their peers' needs.

Each year, the Women's Auxiliary to Children's Medical Center teams up with community schools and organizations to raise funds during the Change for Children's spring campaign. As a part of the campaign, students are given an official Change for Children's collection box and are encouraged to use creative ways to collect change from family, friends and neighbors to fill their Change for Children's boxes.

Where do the donations go?

ALL proceeds benefit the Pet Therapy program at Children's Health.

When are the change boxes due?

Change boxes are due on a mutually agreed upon date.

May I also collect bills, checks and online donations?

YES! Make checks payable to "Women's Auxiliary" or visit childrens.com/changeforchildrens for online.

Still Have Questions?

Contact us at change.dallas@childrensauxiliary.org.

About Children's HealthSM

Children's Health is the leading pediatric healthcare system in North Texas and one of the largest pediatric health care providers in the nation. A private, not-for-profit organization, Children's Health is anchored by two full-service hospitals and one specialty hospital. The system includes an extensive network offering virtual, urgent, primary, specialty care and more to the children of North Texas and beyond. In addition, Children's Health is affiliated with UT Southwestern as the official pediatric teaching hospital for the medical school. This means access to world-renowned medical faculty and transformative biomedical research.

About the Women's Auxiliary to Children's Medical Center 2020

The Women's Auxiliary to Children's Medical Center was formed in 1962 and celebrates more than 58 years of service and over 850 members dedicated to serving the patients and families treated at Children's Health. Since its inception, the Auxiliary has contributed more than \$22 million to Children's.

About the Pet Therapy Program

The Pet Therapy program at Children's Health brings smiles to countless faces, motivating patients, reducing fears and offering unconditional love. Pet Therapy helps patients improve social, emotional and cognitive functioning. The team of 11 dedicated facility dogs deliver the comfort of home to patients at Children's.
